Solace Pro Highlights

Position control

Handsfree usage

Changeable attachments

Immersive
AI/VR Experience

Real-time Sync

Manual use

LOVENSE

Precision Real-time Position Control with Stepless APP Control

Easily control the stroker's speed and position with a single control ball in our app. Solace Pro's hardware ensures accurate syncing with video for enhanced enjoyment.

Control the stroker's position in real-time with your finger; as your finger moves up, the stroker moves up. This allows you to fine-tune your experience to the exact millimeter (minimum 0.65 mm), ensuring a precise and personalized session.

Visual Movement Animation

There is a toy view in 2 sizes to show how Solace Pro react to the movement of the control ball when enabling position function. It can be also folded up. Especially for your long-distance partner to control, partner can observe the stroker's real-time reactions to enhance your comfort.

LOVENSE

Desk Mount Adjustment

Install easily with a single screw locking mechanism and an upgraded adjustment range of 6cm. The screw securely fixes into the mount, ensuring stability and allowing for a 180° angle adjustment.

LOVENSE

Detach for manual use

The TPE stroker can be easily attached or detached, used for manual stroking, and has potential for future accessory development.

TPE stroker can be easily attached and detached.

Potential to develop more accessories in the future.

Can be used separately for manual stroking.
